

ASSESSMENT MANUAL

R16 REGULATION

DEPARTMENT OF ELECTRONICS & COMMUNICATION ENGINEERING
BONAM VENKATA CHALAMAYYA INSTITUTE OF TECHNOLOGY & SCIENCE
AMALAPURAM

1. INTRODUCTION

Outcome Based Education (OBE) is an educational model that forms the base of a quality education system. There is no single specified style of teaching or assessment in OBE. All educational activities carried out in OBE should help the students to achieve the set goals. The faculty may adapt the role of instructor, trainer, facilitator, and/or mentor, based on the outcomes targeted.

OBE enhances the traditional methods and focuses on what the Institute provides to students. It shows the success by making or demonstrating outcomes using statements "able to do" in favor of students. OBE provides clear standards for observable and measurable outcomes.

WHY OBE?

- International recognition and global employment opportunities.
- More employable and innovative graduates with professional and soft skills, social responsibility and ethics.
- Better visibility and reputation of the technical institution among stakeholders.
- Improving the commitment and involvement of all the stakeholders.
- Enabling graduates to excel in their profession and accomplish greater heights in their careers.
- Preparing graduates for the leadership positions and challenging them and making them aware of the opportunities in the technology development.

BENEFITS OF OBE

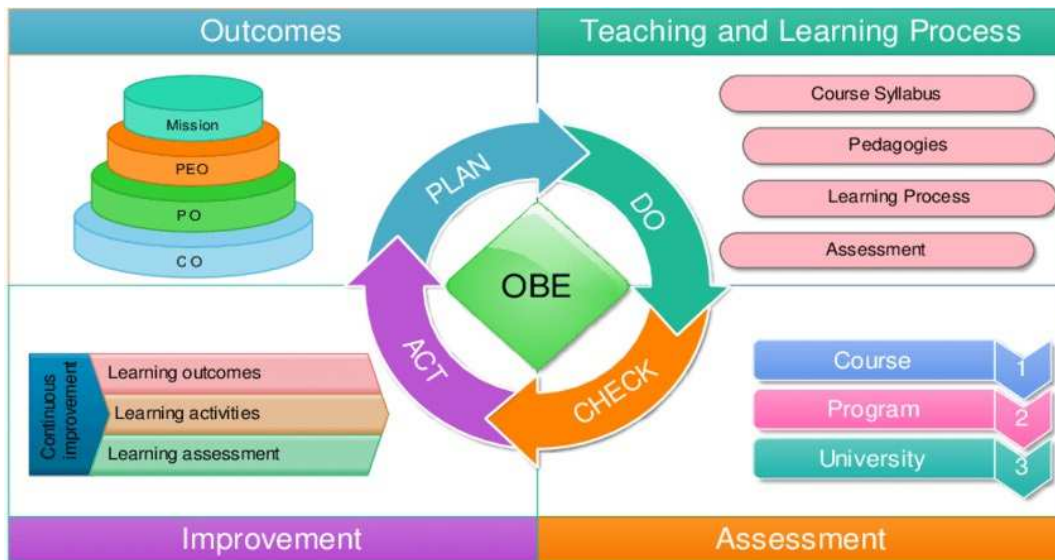

- **Clarity:** The focus on outcome creates a clear expectation of what needs to be accomplished by the end of the course.
- **Flexibility:** With a clear sense of what needs to be accomplished, instructors will be able to structure their lessons around the students' needs.
- **Comparison:** OBE can be compared across the individual, class, batch, program and institute levels.
- **Involvement:** Students are expected to do their own learning. Increased student involvement allows them to feel responsible for their own learning, and they should learn more through this individual learning.

FEATURES OF OBE

OBE is an educational process that focuses on what students can do or the qualities they should develop after they are taught.

OBE involves the restructuring of curriculum, assessment and reporting practices in education to reflect the achievement of higher order learning and mastery rather than accumulation of course credits.

- Both structures and curricula are designed to achieve those capabilities or qualities.
- Discourages traditional education approaches based on direct instruction of facts and standard methods.
- It requires that the students demonstrate that they have learnt the required skills and content.

EXPECTATIONS OF STUDENTS UNDER OBE – THE OUTCOME

- Students are expected to be able to do more challenging tasks other than memorize and reproduce what was taught.
- Students should be able to: write project proposals, complete projects, analyze case studies, give case presentations, show their abilities to think, question, research, and make decisions based on the findings.
- Be more creative, able to analyze and synthesize information.
- Able to plan and organize tasks, able to work in a team as a community or in entrepreneurial service teams to propose solutions to problems and market their solutions.
- Students should be enriched on three dimensional scales of knowledge, skill and attitude throughout the course or programme.

INSTITUTE VISION AND MISSION

Vision

To be a Premier Institution in Education and Research, producing global leaders in Engineering, Technology and Management

Mission

- IM 1.** Imparting quality and outcome-based education towards academic excellence
- IM 2.** Inculcating team spirit and professional ethics among stakeholders.
- IM 3.** Strengthening links with industry through internships and collaborative development works.

DEPARTMENT VISION AND MISSION

Vision

To become a recognized centre for quality electronics and communication engineering education and develop ethically sound, globally competent and socially responsible engineers
Department Vision statement comprises of two components:

Mission

- DM 1.** To provide learner-centric Electronics and Communication Engineering education to overcome the professional challenges
- DM 2.** To pursue research and new technologies in Electronics & Communication Engineering and related disciplines to serve the society, industry, government and scientific community needs.
- DM 3.** To promote activities for overall development of stakeholder with ethical and professional responsibility.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO 1 Graduates will excel in their professional career and/or higher education by applying knowledge of Mathematical, Scientific and Electronics and Communication engineering.

PEO 2 Graduates will analyse and solve real life problems, adopt the modern engineering tools to design systems that are economically feasible and socially acceptable

PEO 3 Graduates will exhibit professionalism, social, ethical responsibility and inter-personal skills to relate engineering issues in broader social context.

PEO 4 Graduates will have the zeal and motivation to get involved in lifelong learning process to become Innovators, Entrepreneurs and Leaders.

PROGRAM OUTCOMES (POs)

PO1 ENGINEERING KNOWLEDGE: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2 PROBLEM ANALYSIS: Identify, formulate, research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3 DESIGN/DEVELOPMENT OF SOLUTIONS: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4 CONDUCT INVESTIGATIONS OF COMPLEX PROBLEMS: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5 MODERN TOOL USAGE: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6 THE ENGINEER AND SOCIETY: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7 ENVIRONMENT AND SUSTAINABILITY: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8 ETHICS: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9 INDIVIDUAL AND TEAM WORK: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10 COMMUNICATION: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, give and receive clear instructions.

PO11 PROJECT MANAGEMENT AND FINANCE: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12 LIFE-LONG LEARNING: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES (PSOs)

PSO 1 Professional Skills: An ability to design, analyse and implement Analog and Digital Electronics systems, Communication, Signal processing, VLSI, Embedded and IoT systems using hardware and software.

PSO 2 Soft-Skills & Ethics: Ability to communicate effectively and practice professional ethics for societal benefit.

OBE FRAMEWORK OF THE INSTITUTE

The adoption of OBE framework

I. Before Start of Semester

- Competency Matrix
- Subject Preference form
- Subject Allotment by HoD (Based on Competency)
- Subject confirmation by faculty
- Curriculum, Lesson Plan, Course file, Authentication by HoD

II. During Semester

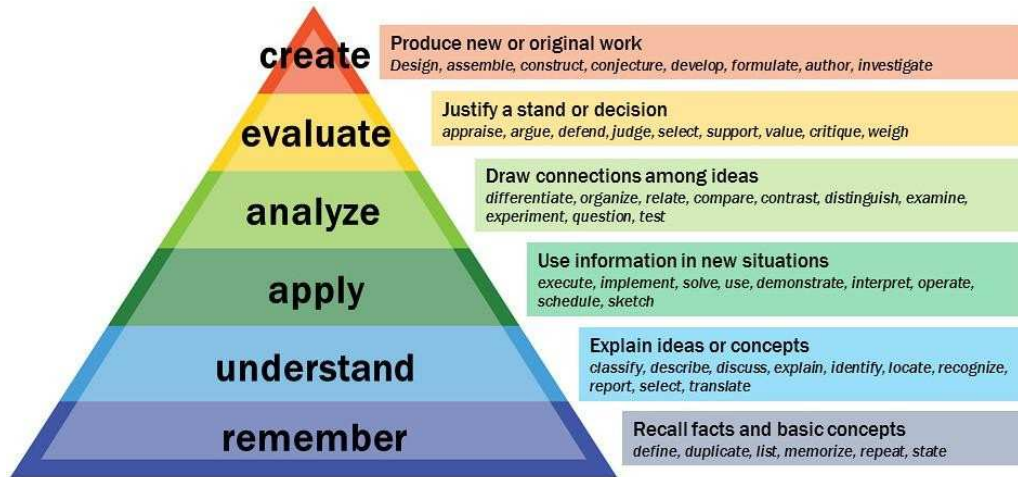

- Verification of Course file/Lesson plan
- Approve & allow to teach
- Identifying student competency & action taken
- Execution of all other activities

III. Till End of Semester

- Implementation & Verification in classrooms and labs
- If any difficulty faced, Resolve with Subject Expert/Program Coordinator/HoD
- Assessment and Evaluation, CO-PO attainments & analysis
- Submission of Analysis to PAQIC / HoD

REVISED BLOOM'S TAXONOMY (RBT)

Bloom's taxonomy is considered as the global language for education. Bloom's Taxonomy is frequently used by teachers in writing the course outcomes as it provides a readymade structure and list of action verbs. A summary of Anderson and Krathwohl's revised version of Bloom's taxonomy of critical thinking is provided in below Figure 1:

Definitions of the different levels of thinking skills in Bloom's taxonomy

- **Remember:** Recalling relevant terminology, specific facts, or different procedures related to information and/or course topics. At this level, a student can remember something, but may not really understand it.
- **Understand:** The ability to grasp the meaning of information (facts, definitions, concepts, etc.) that has been presented.
- **Apply:** Being able to use previously learned information in different situations or in problem solving.
- **Analyze:** The ability to break information down into its component parts. Analysis also refers to the process of examining information in order to make conclusions regarding cause and effect, interpreting motives, making inferences, or finding evidence to support statements/arguments.
- **Evaluate:** Being able to judge the value of information and/or sources of information based on personal values or opinions.
- **Create:** The ability to creatively or uniquely apply prior knowledge and/or skills to produce new and original thoughts, ideas, processes, etc. At this level, students are involved in creating their own thoughts and ideas.

The cognitive process dimensions- categories					
Lower Order of Thinking (LOT)			Higher Order of Thinking (HOT)		
L1: REMEMBER	L2: UNDERSTAND	L3: APPLY	L4: ANALYSE	L5: EVALUATE	L6: CREATE
<ul style="list-style-type: none"> • Recognizing (identifying) • Recalling (retrieving) 	<ul style="list-style-type: none"> • Interpreting • Exemplifying • Classifying • Summarizing • Inferring (concluding) • Comparing • Explaining 	<ul style="list-style-type: none"> • Executing • Implementing 	<ul style="list-style-type: none"> • Differentiating • Organizing • Attributing 	<ul style="list-style-type: none"> • Checking (coordinating, detecting, testing, monitoring) • Critiquing (judging) 	<ul style="list-style-type: none"> • Planning • Generating • Producing (constructing)

The Knowledge Dimension

GUIDELINES FOR WRITING COURSE OUTCOME STATEMENTS

What are Course Outcomes?

- Course Outcomes (COs) are what the student should be able to do at the end of a course
- It is an effective ability, including attributes, skills and knowledge to successfully carry out the
- identified activity
- The most important aspect of a CO is that it should be observable and measurable

Structure of a CO statement

Action: Represents a cognitive/ affective/ psychomotor activity the learner should perform. An action is indicated by an action verb, occasionally two, representing the concerned cognitive process(es).

Knowledge: Represents the specific knowledge from any one or more of the eight knowledge categories

Condition: Represents the process the learner is expected to follow or the condition under which to perform the action (This is an optional element of CO)

Criteria: Represent the parameters that characterize the acceptability levels of performing the action (This is an optional element of CO)

While writing COs the following questions/points must be addressed properly.

Specific	Is there a description of precise behavior and the situation it will be performed in? Is it concrete, detailed, focused and defined?
Measurable	Can the performance of the outcome be observed and measured?
Achievable	With a reasonable amount of efforts and application can the outcome be achieved? Are you attempting too much?
Relevant	Is the outcome important or worthwhile to the learner or stakeholder? Is it possible to achieve this outcome?
Time-Bound	Is there a time limit, rate, number, percentage or frequency clearly stated? When will this outcome be accomplished?

Dos and Don'ts

- Use only one action verb
- Do not use words including 'like', 'such as', 'different', 'various' 'etc.' with respect to knowledge elements. Enumerate all the relevant knowledge elements.
- Put in effort to make the CO statement as detailed as possible, and measurable.
- Do not make it either too abstract or too specific

Check List

- ✓ Does the CO begin with an action verb?
- ✓ Is the CO stated in terms of student performance (rather than teacher performance or course content to be covered)?
- ✓ Is the CO stated as a learning product rather than as a learning process?
- ✓ Is the CO stated at the proper level of generality, and relatively independent of other COs?
- ✓ Is the CO attainable in the given context (students' background, prerequisite competences, facilities, time available and so on)?

Number of COs for a Course

- Too small a number of COs do not capture the course in sufficient detail and may not serve instruction design that well.
- Too many COs make all the processes related to assessment design and computation of attainment of COs messy and demanding.
- A 3:0:0, 3:1:0 and 3:0:1 course should have 5 or 6 course outcomes.

CO – PO Mapping Guidelines

Consider any Two Minimum Criteria for CO – PO Mapping Justification

- **Contact Hours: Lectures, Tutorials and Practical**

Level	Contact Hours in Percentage (including Lecture, Tutorial & Practical)
No mapping (-)	< 5%
Low (1)	5- 15%
Medium (2)	15- 25%
High (3)	>25%

Description:

Number of Lectures = 3per week x 16 weeks = 48 Hours Tutorial = 1Hr x 16 Weeks = 16 Hours

Practical = 2Hr x 16 Week = 32 Hours Total Hrs. = 48+16+32 = 96 Hrs.

Example: Let, CO1 related points are engaged in 10 Lectures + 1 Tutorial and 2 Practical Hours

Then contact hours = 10+1+2x2 = 15 hours

Therefore, contact hours in percentage = $(15/96) \times 100 = 15.65 \%$. Medium mapping (2)

- **Number of Assessment Tools used**

Level	Assessment tools used to assess the CO
No mapping (-)	0
Low (1)	1 or 2
Medium (2)	3
High (3)	4 or more

CO ASSESSMENT PROCESS

CO Assessment process is done based on the performance of the student using Direct Method (MID exam, Assignment, Semester End Examination) and Indirect Method (Course Semester End Feedback)

For the assessment of Course Outcomes, 80% weightage is given to Direct Assessment and 20% weightage is given to Indirect Assessment.

List of Assessment Processes

Course Type	Direct Assessment Methods		Indirect Assessment Methods
	Internal	External	
Theory Course	<ul style="list-style-type: none"> ✓ Mid Examinations ✓ Assignment 	<ul style="list-style-type: none"> ✓ Semester End Examination 	<ul style="list-style-type: none"> ✓ Course End Feedback
Lab Course	<ul style="list-style-type: none"> ✓ Day – to – Day work ✓ Record ✓ Internal Examination 	<ul style="list-style-type: none"> ✓ Semester End Examination 	<ul style="list-style-type: none"> ✓ Course End Feedback
Seminar	<ul style="list-style-type: none"> ✓ Synopsis ✓ Mid Term Evaluation ✓ Internal Evaluation 	NA	NA
Project	<ul style="list-style-type: none"> ✓ Synopsis ✓ Mid Term Evaluation ✓ Internal Evaluation 	<ul style="list-style-type: none"> ✓ End Evaluation 	NA

The Quality / Relevance of assessment processes & tools used

Theory Courses Evaluation

For theory subjects, during the semester there shall be 2 tests. The weightage of Internal marks for 30 consists of Descriptive – 15, Assignment - 05 (Theory, Design, Analysis, Simulation, Algorithms, Drawing, etc. as the case may be and for Physics, Virtual Labs to be considered as Assignments) Objective -10 (Conducted at College level with 20 Multiple choice question with a weightage of ½ Mark each). The objective examination is for 20 minutes duration. The subjective examination is for 90minutes duration conducted for 15 marks. Each subjective type test question paper shall contain 3 questions and all questions need to be answered. The Objective examination conducted for 10 marks and subjective examination conducted for 15marks are to be added to the assignment marks of 5 for finalizing internal marks for 30.

Internal Marks can be calculated with 80% weightage for best of the two Mids. and 20% weightage for another Mid Exam. As the syllabus is framed for 6 units, the 1st mid examination (both Objective and Subjective) is conducted in 1-3 units and second test in 4-6 units of each subject in a semester.

The end semester examination is conducted covering the topics of all Units for 70 marks. End Exam Paper: Part-A 1st Question is mandatory covering all the syllabus which contains seven 2 marks questions for 14 marks with at least 2 marks of question for each of the six units and in Part-B 4 Questions out of 6 Questions are to be answered with each carrying 14 marks. Part-A & Part-B put together gives for 70marks.

Direct Method:

Evaluation	Exam Mode	Max. Marks	Frequency	Duration
Internal	MID (Descriptive)	15	Twice per Semester	90 min.
	Objective Quiz (MCQ)	10	Twice per Semester	20 min.
	Assignment	5	Six per Course	-
	Internal Assessment (30 marks) = 80% of Best Mid Marks + 20% of the other Mid Marks			
External	Part A	14	Once per Semester	180 min.
	Part B	56		

Quality of the Assessment Tool

- Due weightage is given to all the CO's covered by the portion meant for each internal exam.
- Each CO to which the Question belongs to is mentioned along with Blooms taxonomy level.
- Course coordinator along with its team validates the Question paper to ensure the desired standard from outcome attainment perspective as well as learning levels perspective.

Laboratory Course Evaluation

For practical subjects there shall be continuous evaluation during the semester for 25 internal marks and 50 end examination marks. The internal 25 marks shall be awarded as follows: day to day work - 10 marks, Record – 5 marks and the remaining 10 marks to be awarded by conducting an internal laboratory test. The end examination shall be conducted by the teacher concerned and external examiner.

Direct Method:

Evaluation	Exam Mode	Max. Marks	Frequency	Duration
Internal	Day – to – Day work	10	Once per Experiment	150 min.
	Laboratory Record	5	Once per Experiment	
	Internal Exam	10	Once per Semester	180 min.
External	End Exam	50	Once per Semester	180 min.

Rubrics used for laboratory Course

Parameters	Marks	Poor	Average	Good
Students' observation book preparation	5	Insufficient	Fair	Good
		0 – 2 Marks	3 – 4 Marks	5 Marks
Attendance	5	75 % - 80 %	80 % - 90 %	90 % - 100 %
		0 – 2 Marks	3 – 4 Marks	5 Marks
Record	5	Insufficient recording of content, calculations and conclusion	Fair recording of content, calculations and conclusion	Good recording of content, calculations and conclusion
		0 – 2 Marks	3 – 4 Marks	5 Marks

Rubrics used for Laboratory Internal Examination

Parameters	Marks	Poor	Average	Good
Experiment writeup	3	Not able to write procedure and calculations	Able to write procedure but not able to show calculations	Able to write procedure and show calculations
		0 – 1 Marks	1 – 2 Marks	3 Marks
Execution	4	Not executed	Partially executed	Completely executed
		0 – 1 Marks	2 – 3 Marks	4 – 5 Marks

Viva – Voce	3	Insufficient Knowledge of experiment	Fair knowledge of experiment	Good knowledge of experiment
		0 – 1 Mark	1 – 2 Marks	3 Marks

CO Assessment Process for Engineering Drawing

Direct Method:

Evaluation	Method	Max. Marks	Frequency	Duration
Internal	Day-to-Daywork	20		
	Internal Test	10	Twice per semester	90 Minutes
	Internal assessment (30 marks) = 80% of Best Mid + 20% The other Mid			
External	Exam	70	Once per semester	3 Hours

Mandatory Course (MC)

There shall be Mandatory Course with zero credits. There shall be no external examination. However, a minimum of 75% attendance is mandatory and indirect assessment is taken in that particular subject.

Seminar

For the seminar, each student has to be evaluated based on the presentation of any latest topic with report of 10-15 pages and a ppt of min 10 slides. The student shall collect the information on a specialized topic and prepare a technical report, showing his understanding over the topic, and submit to the department, which shall be evaluated by the Departmental committee consisting of Head of the department, seminar supervisor and a senior faculty member. The seminar report shall be evaluated for 50 marks. There shall be no external examination for seminar.

CO Assessment Process for Seminar

Evaluation	Method	Marks	Weightage	Duration
Internal	Mid-term review 1	15	30% of max. marks	15 min. per student
	Mid-term review 2	15	30% of max. marks	
	Final review	20	40% of max. marks	

Rubrics for seminar Internal Evaluation

Parameter	Rubric			Marks
	Poor	Average	Good	
Seminar report	Objectives not clear	Clear objectives and organized	Clear objectives, advanced technology based and organized	20
	1 – 6 Marks	7 – 14 Marks	15 – 20 Marks	
Preparation	Contents are inappropriate	Appropriate contents, not well arranged	Appropriate contents and well arranged	20
	1 – 6 Marks	7 – 14 Marks	15 – 20 Marks	
Queries answered	No answer or explanation	Inappropriate answer and explanation	Clear, concise answer with explanation and with supported facts	10
	1 – 3 Marks	4 – 6 Marks	7 – 10 Marks	

Project

Out of a total of 200 marks for the project work, 60 marks shall be for Internal Evaluation and 140 marks for the End Semester Examination. The End Semester Examination (Viva – Voce) shall be conducted by the committee. The committee consists of an external examiner, Head of the Department and Supervisor of the Project. The evaluation of project work shall be conducted at the end of the IV year. The Internal Evaluation shall be on the basis of two seminars given by each student on the topic of his project and evaluated by an internal committee.

CO Assessment Process for Project

Review #	Coverage Points	Marks	Weightage
1	Project Proposal Evaluation	20	30%
2	Mid – Term Evaluation	20	
3	Final Evaluation	20	

External Project Evaluation	140	70%
Total	200	100%

Rubrics for Project Internal Evaluation

Review #	Parameter	Rubric			Marks
		Poor	Average	Good	
1	Objectives, Project Synopsis, Literature Survey	Need Improvement	Clear and Moderate	Well defined and good	20
		0 – 7 Marks	8 – 14 Marks	15 – 20 Marks	
2	Proposed Methodology & Project execution progress	Need Improvement	Clear and Satisfactory	Well defined and good	20
		0 – 7 Marks	8 – 14 Marks	15 – 20 Marks	
3	Result, Conclusion and Presentation	Inappropriate	Average	Effective	20
		0 – 7 Marks	8 – 14 Marks	15 – 20 Marks	

Indirect Method

The indirect assessment for course outcome is done by the Semester End Course Feedback taken at the end of each course from the students. For each CO, there will be three options with weightage namely GOOD (3), AVERAGE (2) AND POOR (1), out of which the student has to select one option.

Sl. No.	Method	Frequency
1	Course End Feedback	Per course at the end of each semester

CO ATTAINMENT PROCESS

Course Outcomes (CO) Direct Attainment Level

S. No.	Threshold level (%)	Attainment level Criteria	Attainment level
1	Class Average	More than 80% of students scoring more than class average	3
		56 to 79% of students scoring more than class average	2
		At least 55% of students scoring more than class average	1

University Result grading system

Marks Range Theory (Max – 100)	Marks Range Lab (Max – 75)	Letter Grade	Level	Grade Point
≥ 90	≥ 67	O	Outstanding	10
≥80 to <90	≥60 to <67	S	Excellent	9
≥70 to <80	≥52 to <60	A	Very Good	8
≥60 to <70	≥45 to <52	B	Good	7
≥50 to <60	≥37 to <45	C	Fair	6
≥40 to <50	≥30 to <37	D	Satisfactory	5
<40	<30	F	Fail	0
			Absent	0

Course Outcome Attainment

Computation of CO Direct Attainment in the course

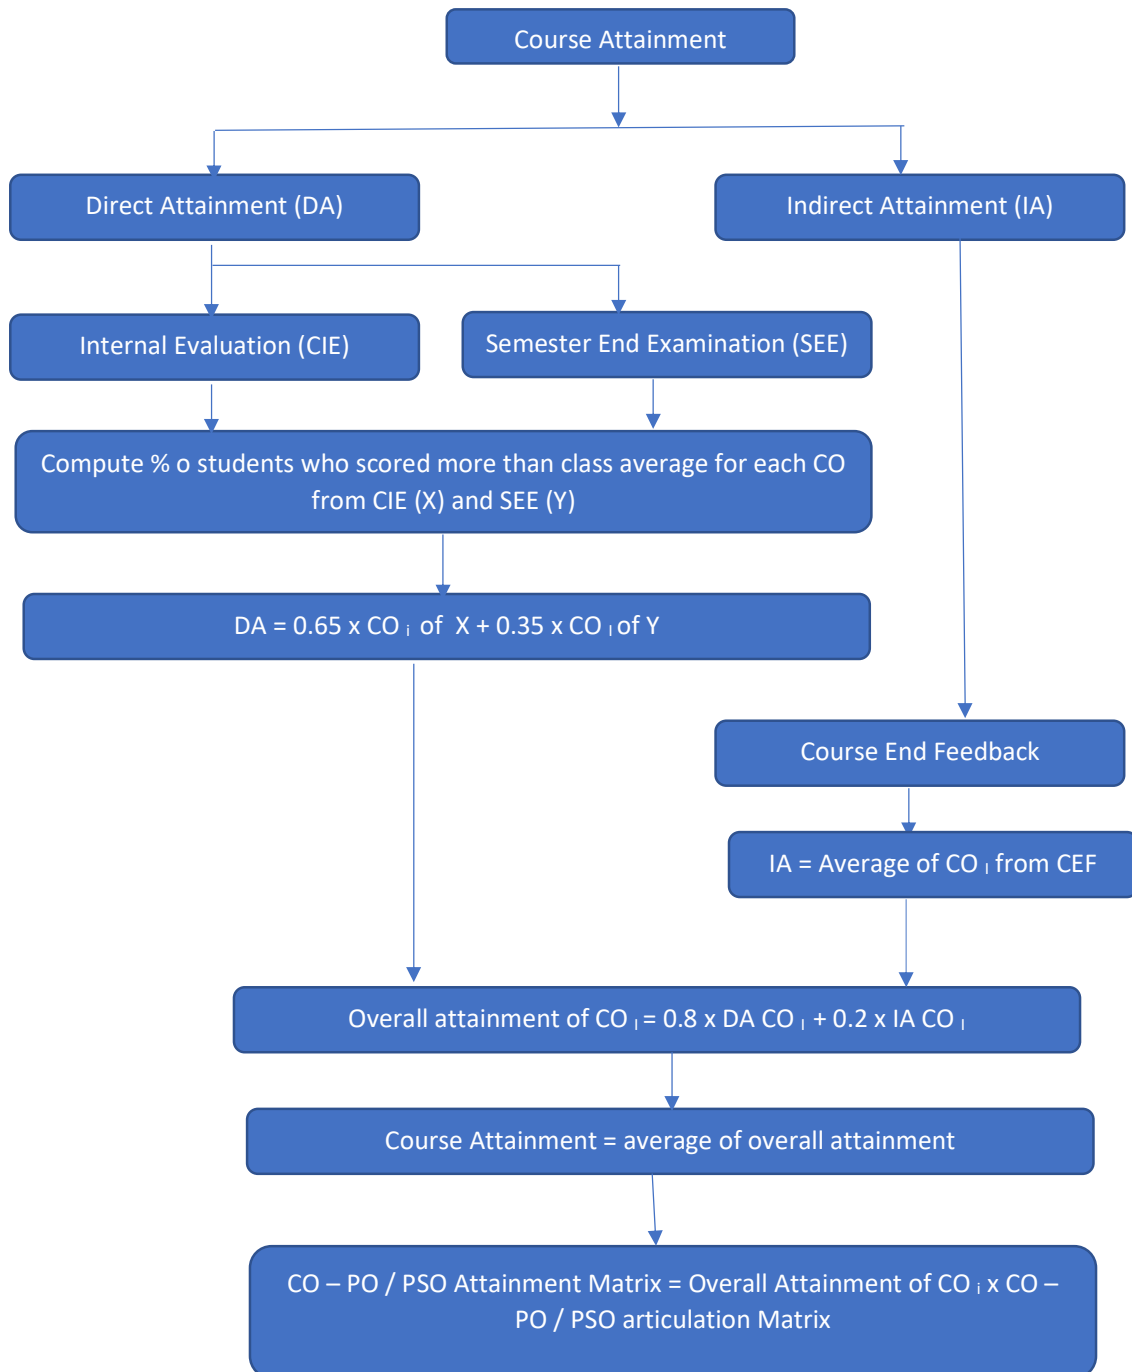

Direct CO Attainment = 65% of CIE Attainment Level + 35% of SEE Attainment Level

Computation of CO Indirect Attainment in the course

Indirect Attainment Average value of each CO

OVERALL CO Attainment in the course:

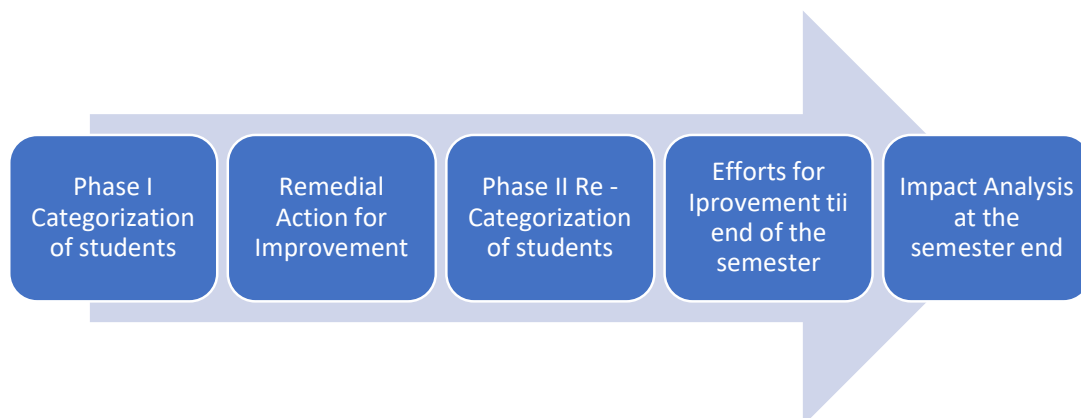

Computation of Attainment of COs in the course = 80% of Direct CO Attainment + 20% of Indirect CO Attainment

STUDENT COMPETENCY

Chart of Action Plan

Guidelines for First Year

Phase I- Categorization (After 20 Days of start of semester)	Phase II- Re-categorization (After Mid Term Result)
12th Marks	MID Term I Result
Attendance & Behavior	Timely Completion of Assignment
	Attendance & Behavior
	Previous Semester University Result (Applicable for Sem-II)

Guidelines for Higher Classes

Phase I- Categorization (After 15 Days of start of semester)	Phase II- Re-categorization (After Mid Term Result)
Previous semester University Result whichever is available	Mid Term Result
Attendance & Behavior	Timely completion of Assignment work
	Attendance & Behavior
	Previous semester University Result

Base Score for student category

Less than **threshold value*** - Slow Learner

Greater than **threshold value*** - Advanced Learner

*Threshold Value – decided by course coordinator

Strategies for Slow and Advanced Learners

For Slow learners

- Document/record of remedial classes with timetable & attendance
- Specially designed assignment/ task
- Student study group for peer to peer learning
- Individual Counseling

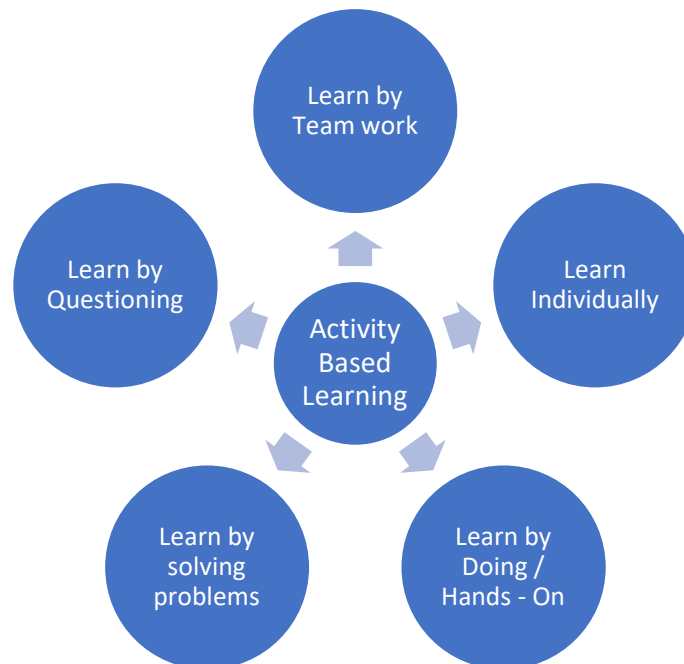

Note: Remedial sessions should be conducted once every week.

For Advanced Learners

- Encouraging to present & publish papers in journals/conferences/competitions
- Guidance for GATE/ competitive Examination
- Encouraging to participate in professional activities.
- Specially designed activities to improve the portfolio of students.
- Individual guidance for career building

Note: Activities should be on continuous basis.

Activity Based Learning

Examples:

MOOC, Flipped Classroom, Think Pair Share, Think Pair Solo, Four Corners, Round Robin, Collaborative Learning, Jig-Saw Puzzle, Matrix Method, Peer Learning, Work-Based Learning, Problem-Based Learning, Personalized Learning, Group Discussion, Debate, Case Studies, Fish Bowl, Reciprocal Teaching, etc.

ATTAINMENT OF PROGRAM OUTCOMES (POs) AND PROGRAM SPECIFIC OUTCOMES (PSOs)

For **Direct Attainment** of POs/PSOs course attainment is computed for all the courses that the batch has studied/opted and CO-PO/PSO attainment averages are obtained for all the Courses. The Course-PO/PSO attainment matrix is prepared by arranging the Course-PO/PSO attainment of all the courses in a table. Individual Course-PO/PSO attainments are obtained by taking the average of the respective columns of Course-PO/PSO attainment matrix.

Evaluations of attainment of POs and PSOs based on 80% of Direct Attainment (DA) + 20% of Indirect Attainment (IA) combined to arrive at the Final Evaluation.

Indirect Attainment is computed using the tools including:

- **Student Exit Feedback** is collected from the students of that batch immediately after their graduation.
- **Employer Feedback** is collected from the corporate companies which recruit students in big numbers.
- **Indirect attainment through Co-Curricular activities** is computed through student achievements which include paper presentations, project presentations, coding competitions, participation in seminars / workshops / Guest Lectures / Keynote addresses and internships.
- **Indirect attainment through extracurricular activities** is computed through student achievements which include NSS, College Newsletter, Event coordination, Cultural Activities, Sports.

List of Assessment Tools and Processes

Attainment of POs & PSOs is based on direct assessment tools as well as indirect assessment tools. Direct Assessment of POs & PSOs is based on the student's performance in both internal examinations and University Examinations for all courses.

Performance of the students in different assessments such as internal examinations and University examinations lead to attainment of COs and they in turn leads to attainment of POs & PSOs based on the mappings of CO-PO/PSO.

To evaluate the attainment of POs/PSOs the following tools are used.

- Direct Assessment Tools
 - Internal Examinations
 - Theory Courses
 - Lab Courses

- Seminar
- Project
- University Examinations
 - Theory Courses
 - Lab Courses
 - Project
- Indirect Assessment Tools
 - Student Exit Feedback
 - Alumni Feedback
 - Employer Feedback

Quality and Relevance of Assessment Tools and Processes

The Programme Assessment and Quality Improvement Committee (PAQIC) decided to have the following PO Assessment methods for various POs, depending on the number of courses contributing to each PO.

PO Attainment having more than 50% courses contributed to PO / PSO

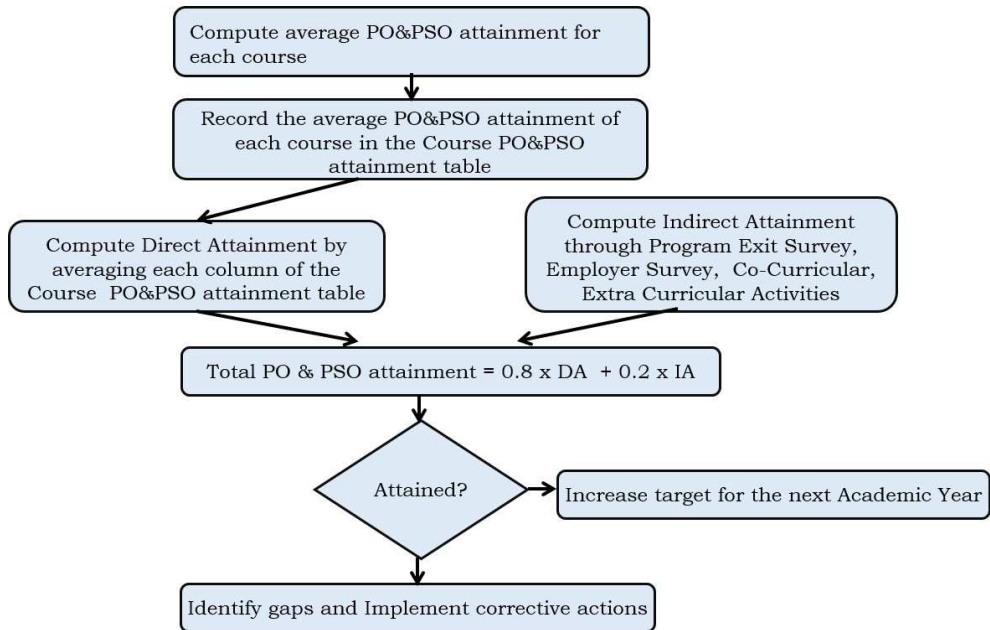

1	Assessment of COs & their contribution to PO Attainment	80 %
2	Indirect Assessment (Students Exit Feedback, Alumni Feedback, Employer Feedback)	20 %

PO Attainment having less than 50% courses contributed to PO / PSO

1	Assessment of COs & their contribution to PO Attainment	60%
3	Students Exit Feedback	20 %
2	Alumni Feedback	
3	Employer Feedback	
4	Assessment of student participation in Co/Extra-curricular Activities & contribution to PO Attainment	20%

Rubrics for student participation in Co / Extra-Curricular activities for attainment of PO / PSO

S. No	Activity	Low (1)	Medium (2)	High (3)	Assessment
1.	Guest Lectures (Co-Curricular)	1 Guest Lectures organized	2 Guest Lectures organized	>= 3 Guest Lectures organized	3
2.	Add-on courses (Co-Curricular)	Nil	1-2 programs organized	More than 2 programs organized	2
3.	NSS Activities (Extra- Curricular)	Less than 25% student's participation	26-50% student's participation	Above 50% student's participation	3
4.	Programs on Entrepreneurship	Nil	1-2 programs organized	More than 2 programs organized	2
5.	Job/Skill Oriented Programs	1-4 Programs	5-8 Programs	More Than 8 Programs	3
6.	Students participation in cultural activities	10-25% students participate	26-50% students participated	More than 50% students participated	1
7.	Students internships	Less than 1% students	1-10% students	More than 10%	3
8.	Workshop Conducted for Students	1-2 Workshop Conducted	3 -5 Workshop Conducted	More than 5 Workshop Conducted	1

CONTINUOUS IMPROVEMENT

Contribution of CO in PO attainment and Continuous Improvement (Faculty Level)

Outcome	Action to be taken by faculty
High attainment of all CO-PO (>2.5 out of 3)	Set new higher targets or attainment levels for next Academic Year (AY)
Moderate attainment of all CO-PO (1.8 to 2.49 out of 3)	Record observations, Continue action plan of last A.Y. with plan for improvements.
Low attainment of all CO-PO (0.9 to 1.79 out of 3)	Record observations, assess the target set, revise/improve action plan of last A.Y. to achieve the attainment with plan for improvements.
CO-PO not attained, poor performance (<0.9 out of 3)	Record observations, Critical assessment of target with Program Assessment and Quality Improvement Committee (PAQIC), Revise action plan of last A.Y. at faculty/department level.

PO attainment and Continuous Improvement (PC and HoD Level)

Category	Outcome	Action by PC and HoD
Course Related	PO attained highly	Include activities with HOT.
	PO not attained highly	Identify concerned courses, plan for immediate improvements, guide, support and monitor its execution.
Activity Related	Activities Conducted	Critical assessment, impact analysis to be done and revise as per the need for improvements.
