6. Contact	5

1. About Us

Sunce Smart Solutions Private Limited is a subsidiary of Aceline Tech Solutions (Aceline), a niche technology solutions and services provider established in the year 2010. Aceline is an experienced and energetic team with domain expertise in the space of Agriculture, Education, Manufacturing, IT, Retail, Dairy, Financial Services, Public Sector and Electronics. Aceline offers specialized solutions in Artificial Intelligence, IoT, Analytics, RPA and having expertise in cloud solutions of SAP (Callidus, Hybris), Service Now and Salesforce.

Aceline always strives to keep itself ahead of the competition and keeps an eye on the global trends in the industry.

Aceline's other major offerings include IT Services and Staff Augmentation. We utilize our experience in the creation and implementation of processes and best practices that enable us to provide consistent service delivery

Through Sunce Smart Solutions, Aceline has a footprint of its own in the educational sector and is one of the organizations pioneering remote assessments and proctored assessments.

Initially developed to assist internal recruitments, Aceline commercially launched the platform in 2017 and started servicing the clients from early 2018. The services were re-branded as "Xplore" and is one of the industry firsts again to integrate online learning, LMS, assessments and recruitments all in one. Headquartered in Hyderabad, India, with Corporate Office in Vijayawada, Andhra Pradesh, Hayago Smart Solutions provides services globally and has associate partners in Singapore and Japan.

Our Mission

Develop & Deliver Content that makes learning simple, interesting & effective

Our Quality Focus

We utilize our experience in the creation and implementation of processes and best practices that enable us to provide consistent service delivery

Our Uniqueness

Our 3T Model (Talent Identification, Talent Grooming & Talent Deployment) sets us way apart and ahead from our competition. With focussed approach on *Talent Identification* (Software Platform), *Talent Grooming* (Trainings, Internships, Projects) and *Talent Deployment* (Placements) is making us the best partner for the Training & Hiring needs of various educational institutions and corporates.

2. Xplore Placement Club

A comprehensive service offering from Xplore that offers learning, assessments and placement assistance to the subscribers. Registered students get access to quality content, improve the basics of recruitment, take practice assessments, mock tests of most of the leading recruitment companies including TCS, Wipro, Accenture, DXC, Infosys, etc., practice on real time exam simulators, get ready for the placements and get first hand and priority access to the opportunities published on the platform.

3. Program Structure & Content

The entire program is aimed towards the engineering students across the 4 years of their education. The content is designed and segregated year wise so that the students need not hurry or be under pressure to get placed in their final year.

4. Program Effectiveness & Additional Support

To improve the effectiveness of the program and to aid the students build and leverage on the content delivery, Xplore offers its proprietary platform access to the students for a period of 1 year. In addition, Xplore will also send invitations to the students to any periodic programmes, talks, sessions, etc., that are hosted by the company.

This includes:

- Daily Assessments
- Recorded Video Content (of the trainings)
- Access to
 - Xplore' Exclusive Video Content
 - 10,000+ Practice Questions
 - Mock Tests of 30+ Companies
- Admin Access for the College:
 - Ability to create and administer own tests
 - Access performance reports of the students

The students are supposed to complete the assessments on time. We would share the reports to the college on a regular basis.

To sum up, below are the services that are offered along with this proposal:

#	Service	Details
1	Diagnostic Test	- A pre assessment is conducted before the beginning of the training
2	Online Learning Content for one Academic year	- 300+ video lectures of aptitude & programming - Level wise practice questions - Section & Topics wise tests
3	Company Mock Tests	- 30+ company specific mock tests - which include TCS, Wipro, Infosys, Capgemini, Deloitte, Cognizant and more
4	Post- Assessment Test	- Daily Practice Tests will be conducted before after the completion of the training
5	Comprehensive Reports	- TPO & Management will be shared with complete report of the pre-assessments with areas of improvement

Note:

1. We request the support from the college to ensure 100% active participation of the students to the program and 100% compliance to the assessments & assignments
2. The access to the platform does not include the access to the coding platform. If required, this will be made available at an additional cost
3. However, periodic coding assessments will be organized by Xplore for the students

5. Pricing – Pay after Placement

Module	Per Student Pricing
Xplore enrolment fee	Rs. 5,000 + GST

Note: For above mentioned Xplore Integration training minimum batch size should be 200 members

Day - Wise Planner

Day 1:

Introduction to Java and OOPs

- Introduction to object-oriented programming (OOP) concepts Classes and objects In Java
- Encapsulation, inheritance, and polymorphism
- Exception Handling

Day 2:

Advanced Topics in OOPs

- Abstraction and interfaces
- Abstract classes and methods
- Interfaces and multiple inheritance
- Polymorphism and dynamic method dispatch
- Packages and access modifiers
- Exception handling in Java

Day 3:

Strings and String Manipulation

- Introduction to strings in Java
- String creation and manipulation
- String methods and operations

- String concatenation and formatting
- Regular expressions and string pattern matching

Day 4:

Arrays and ArrayList

- Introduction to arrays in Java
- Array creation, initialization, and manipulation
- Multidimensional arrays
- Introduction to the Collections framework
- Working with ArrayLists
- ArrayList methods and common operations

Day 5:

More on Collections Framework

- Collection interface and its implementations
- List, Set, and Map interfaces
- ArrayList, LinkedList, HashSet, TreeSet, HashMap, TreeMap
- Iterating over collections using iterators and enhanced for loop
- Sorting and searching in collections
- Common collection algorithms and utilities

Day 6,7:

Introduction to Data Structures

- Overview of data structures and their importance Arrays and their operations
- Linked lists: singly linked lists, doubly linked lists
- Implementing and manipulating linked lists in Java

Day 8,9:

Stacks and Queues

- Introduction to stacks and queues
- Implementing stacks and queues using arrays and linked lists
- Stack and queue operations and their time complexities
- Applications of stacks and queues

Day 10,11,12:

Trees and Binary Trees

- Binary tree representation and traversals (pre-order, in-order, post-order)
- Binary search trees and their properties
- Tree traversal algorithms: level order, depth-first search (DFS), breadth-first search (BFS)

Day 13,14,15:

Binary Search Trees and Heaps

- Binary search tree operations: insertion, deletion, searching
- Balanced search trees: AVL trees, Red-Black trees
- Introduction to heaps and their types (min heap, max heap)
- Heap operations: insertion, deletion, heapify
- Applications of heaps

Day 16,17,18:

Sorting Algorithms

- Overview of sorting algorithms: bubble sort, selection sort, insertion sort

- Efficient sorting algorithms: merge sort, quicksort, heapsort
- Comparison of sorting algorithms based on time complexity and stability
- Best practices for choosing and implementing sorting algorithms

Day 19,20,21:

Hashing and Hash Tables

- Introduction to hashing and hash functions
- Collision resolution techniques: chaining, open addressing
- Hash table operations: Insertion, deletion, searching
- Hash table implementation using arrays or linked lists
- Applications of hash tables

Day 22,23,24:

Graphs and Graph Algorithms

- Introduction to graphs and their representations
- Graph traversal algorithms: depth-first search (DFS), breadth-first search (BFS)
- Shortest path algorithms: Dijkstra's algorithm, Bellman-Ford algorithm
- Minimum spanning tree algorithms: Prim's algorithm
- Graph applications and real-world use cases

SCREENSHOTS

The screenshot shows a web browser window with the URL <https://mygreatlearning.com/program/185868/online-program/13928>. The page title is "Virtual Training for AWS IoT (Virtual Batch 2019 - Semester 1)". Below the title, there are navigation tabs: "People", "Online Classes", "Assessments", "Courses", and "Track". Under "Online Classes", there are buttons for "Upcoming classes", "Completed classes", and "+ Schedule online class". A calendar view shows dates for August 2022, July 2022, and June 2022. At the bottom, there is a copyright notice: "© 2022 All rights reserved. Powered by Great Learning".

The screenshot shows an "Online Session Recording" page. The title is "7 Jul - PROGRAMMING". Below the title, there are two sections for video recordings. The first is "Video Recording 1" with a video player showing a blurred recording. The second is "Video Recording 2" with a list of multiple-choice questions. The first question is: "18. Which of the following would you use to instantiate a class in Java?" with options: "A. New Operator", "B. Class.forName('name')", "C. Only A", "D. Only B", "E. Both A and B", "F. None of the given options". The second question is: "19. Boot sector of disk is the first block of first partition and consists of information required by the system to boot an operating system from that disk. What is the boot control block called in disk instructions the booting and using the system?". On the right side, there are toggle switches for "Recording visible to students" set to "YES" and "Recording visible to students" set to "YES". At the bottom, there is an "Activate Windows" watermark.
